PAIRING INSTRUCTIONS

1. Press **PANIC** and **FUNCTION 1** at the same time to enter device setup. The **LED** should turn on.
2. Once in setup mode, enter your code from the vehicle look up list with the following sequence: **LOCK**, **UNLOCK**, and **TRUNK** for the specified number of times. Please see illustrated example. If your vehicle code is **232** you would press the following buttons in their corresponding order the indicated number of times.
3. Press **PANIC** and **FUNCTION 1** at the same time again to exit device setup. The **LED** should blink once and turn off. If the **LED** flashes 3 times after the **PANIC** and **FUNCTION 1** are pressed, an invalid code was entered and the process will need to be repeated starting at Step 1.
4. Program exactly like an original key.
